Harini Balaji

Sheffield, United Kingdom — 07823393181

b_harini@outlook.com | linkedin.com/in/bharini |Portfolio Website: b-harini.github.io/Resume

Professional summary

Experienced Data Analyst skilled in SQL and Python, adept at extracting, cleaning, and analyzing complex datasets to deliver actionable insights. Proven track record in optimizing business operations through data-driven decision-making. Excited to contribute to [Company Name] with expertise in data analysis.

Education

University of Sheffield, United Kingdom
MSc Data Analytics (Accredited by British Computer Society) | *09/2023 – Present*
Notable Modules: Machine Learning and Adaptive Intelligence, Text Processing, Natural Language Processing, Scalable Machine Learning

Anna University, India
Bachelor of Engineering in Computer Science | *08/2015 – 07/2019*
Notable Modules: Programming and Data Structures, Database Management System, Operating Systems, Internet Programming, Data Warehousing and Data Mining, Data Analytics

Projects

Dissertation Project: Sentiment Analysis and Topic Modelling of Special Interest Group Mailing Lists

- **Overview:** Analysed special interest group mailing lists focused on Python-related topics such as databases, mobile, and email.
- **Data Extraction:** Utilized Beautiful Soup for web scraping to systematically extract data from mailing lists.
- **Data Preprocessing:** Employed NLTK library to clean and prepare text data for analysis.
- **Topic Modelling:** Conducted topic modelling to identify prevalent themes within mailing list discussions.
- **Sentiment Analysis:** Applied advanced sentiment analysis using VADER, DistilBERT, and BERT models to determine overall sentiment of the discussions.
- **Technologies and Tools: Programming Languages:** Python **Libraries:** Beautiful Soup, NLTK, VADER, DistilBERT, BERT
- **Key Skills Demonstrated:** Data extraction and web scraping, Text preprocessing and natural language processing (NLP), Advanced sentiment analysis with machine learning model, Topic modelling and thematic analysis

Spotify Data Retrieval and Analysis using API

- Developed and executed efficient API calls in Python to fetch large datasets from Spotify, ensuring optimal data retrieval and handling.
- Integrated and stored the retrieved data in a relational database, utilizing SQL to perform comprehensive data analysis and query execution.

- Analysed and interpreted the data to answer critical business questions, providing actionable insights and supporting data-driven decision-making.

Hypothesis Testing Project

- Conducted hypothesis testing on diverse case studies, evaluating and improving processes across various domains.
- Analysed sample data, computed test statistics, and interpreted p-values to draw meaningful, data-driven conclusions.
- Provided evidence-based insights and recommendations by determining the acceptance or rejection of null hypotheses, enhancing decision-making processes.

Work Experience

Data Analyst — Zuper, India | *06/2022 – 08/2023*

- Zuper Company is a leader in field service management software, providing comprehensive solutions to optimize operations for businesses with field workers.
- As part of the internal analytics team, identified and corrected data inconsistencies, reducing reporting errors by 30%.
- Developed and deployed a data analytics framework with Python, SQL, and Metabase, increasing data processing speed by 25%.
- Enhanced operational efficiency through internal analytics, cutting reporting time by 40% and boosting overall business performance by 27%.

Game Master — Houdini's Escape Room, Sheffield | *12/2023 – Present*

- Crafted engaging narratives and challenging quests, fostering a vibrant gaming community through events and interactions.
- Provided timely support to players, ensuring positive experiences and contributing to a 15% business performance improvement.
- Enhanced escape room experiences by effectively communicating with diverse customers, demonstrating strong leadership and teamwork skills.

Skills and Certification

Technical Skills	SQL, Python, Power BI, Azure Cloud, Web Scraping, Machine Learning, Statistics, Git
Soft Skills	Attention to detail, Analytical and problem-solving skills, Strong communication skills, Adaptability to different languages
Certifications	Microsoft Certified Azure Data Fundamentals (*04/2024)* Microsoft Certified Power BI (*08/2024*) Google Data Analytics Certificate – Coursera (*06/2023*) SQL Intermediate and Silver Badge – Hacker Rank (*02/2024*)
